

Panel A: Cumulative Returns

Panel B: Sharpe Ratio Comparison

Panel C: Drawdown Over Time

Panel D: Performance Summary

Strategy	Return	Vol	Sharpe	Max DD	Sortino
Unconditional	2.63%	3.30%	0.799	-14.7%	1.085
Oracle	4.58%	3.97%	1.154	-14.8%	1.596
AR Baseline	3.33%	4.42%	0.753	-18.5%	0.939
AR Change	3.31%	4.40%	0.753	-18.2%	0.946
Random Walk	2.96%	4.56%	0.648	-21.8%	0.795

Note: all strategies use one-sided regime probabilities (no look-ahead). Oracle is the ONLY strategy using future regime probabilities (infeasible upper bound). TC = 5bps. One-sided series starts 2006-01-30, so the evaluation sample is shorter than the retrospective series: 4746 days from 2007-03-06.
